

## PRESS RELEASE

### **The Information Society S.A. signed a contract with the alliance of companies **ATKOSoft** – Unisystems – Orco, for the Implementation of an Integrated Regional Health Network for Crete**

Athens, January 2006,

The Information Society S.A. for the benefit of the **RNHS (Regional National Health System) of Crete**, signed a contract with the alliance of companies ATKOSoft, Unisystems and Orco, for the **Implementation of an Integrated Regional Health Network for Crete**. The budget is 5.391.800 € and the duration of the project is 30 months.

This project, as far as software applications and accompanying services are concerned (since the project also includes an extensive hardware and networking infrastructure), is about the analysis, design, implementation, support and maintenance of an Integrated Health Information System that consists of:

- Enterprise Resource Planning (ERP) System (including modules like: Accounting, Ledger, Budgeting, Accounts Balancing, Stock Management, Procurement, Assets, Payroll, Cost Accounting, Quality Control etc)
- Patients Management (Inpatients, Admissions, Bed Management, Appointments Management, Billing, Pharmacy, Dietary Control & Management)
- Medical Information System (Outpatients, Medical Acts & Protocols, Medical Results Inference, Past Medical Record, Emergency, Ward Management, Diagnosis, Patients Health Profiling etc)
- Laboratory Information System / Radiology Information System
- HL7 Connectivity
- Business Intelligence, based on Data Warehousing technologies
- Training / SLA

The majority of the above applications and modules will be installed across the various Health Units within the administrative control and geographical region of the Crete RNHS, consisting of:

- Central RNHS Bureau
- University General Hospital of Heraclion
- General Hospital of Heraclion "Venizelio"
- General Hospital of Chania "Ag. Georgios"
- General Hospital of Rethimno
- General Hospital of Ag. Nikolaos
- General Hospital – Health Cente of Ierapetra
- General Hospital – Health Cente of Sitia
- General Hospital – Health Cente of Neapoli
- 14 Health Centres

Crete region has a total population of more that 600.000 inhabitants.

ATKOSoft SA is to cover the part of the project concerning Patients Management, Medical Information system and the HL7 Connectivity, by offering and customising accordingly, the award-winning aMedLine application, along with an extensive set of services concerning applications setup, customisation, fine-tuning, testing, training etc, striving to deliver the project within time and cost limitations, as well as considering for the continuation of the project.

The application is provided to 1.035 RNHS users, covering the island of Crete which consists of four prefectures with several hospitals and health centres, offering in total more than 2.000 beds.

Worth mentioning is the fact that ATKOSoft has taken over the Technical Direction of the project.
